A. GOAL

The primary purpose of the Tokat Gaziosmanpaşa University Artificial Intelligence and Digital Transformation Coordination Office is to plan, guide, and ensure holistic development in advanced technology fields for our university's digital transformation process. In this context, our foremost objectives include strategic planning and supporting applications in innovative areas such as Artificial Intelligence (AI), big data, the Internet of Things (IoT), augmented reality, and cybersecurity, as well as mainstreaming digitalization across academic and administrative processes.

Objectives

- To lead the creation of Artificial Intelligence (AI) and digital transformation strategies within our university, and to implement and monitor these strategies in compliance with current technologies.
- To ensure the integration of AI-based solutions across academic and administrative units.
- To support decision-making processes through big data analytics, data classification, and modeling tools.
- To increase awareness of cybersecurity and information security at the university and offer training on protection methods.
- To develop interactive and personalized educational content within the scope of digital transformation.
- To strengthen university-industry collaboration by developing projects at the local and national level.
- To conduct consultancy and collaboration processes with the public and private sectors, generating solutions for sectoral needs.
- To organize seminars, workshops, and training programs aimed at enhancing the digital competencies of our students and academic staff.
- To establish scientific, technological, and strategic collaborations with national and international networks.

B. MISSION

Our mission, as the Tokat Gaziosmanpaşa University Artificial Intelligence and Digital Transformation Coordination Office, is to support the university's digitalization processes, create added value in academic, administrative, and societal fields through Artificial Intelligence and next-generation digital technologies, and connect all stakeholders of our university with the innovations in this area.

C. VISION

To be an innovative coordination office that pioneers work in the field of Artificial Intelligence and digital transformation, produces sustainable digital solutions, and is recognized at the national and international level.
